## Ready to get started?

Use this worksheet to keep track of your ideas as you go through the course. As you come up with ideas, I suggest you use your scratchpad first to jot down your ideas. After you've had some time to think about them come back to this worksheet and fill them out.

At the end: When you have a complete list of your ideas, use the last sheet to summarize & rank your ideas. Feel free to change your rankings as your thoughts progress. Proceed to the 2<sup>nd</sup> to last section of the course when you have a list and follow the lectures on "Idea Evaluation". See if they're any good ©

**Remember:** You don't have a complete business idea until you all 3 components:

SUBJECT + PROBLEM (or Benefit) + Business Model = IDEA

(See lecture: "Components of Ideas")
